Dec 11 2025 Suicideprevention efforts require coordination and collaboration among multiple sectors including health education labour agriculture business justice law defence politics and the media.Suicideprevention is often not adequately addressed because of stigma and lack of awareness thatsuicideis a major public health problem Sep 18 2024 Suicideis a global public health problem

Every year more than 720 000 people die as a result ofsuicide. The majority of these deaths 73% occur in low and middle income countries

Beyond this suicidehas a ripple effect that impacts on societies communities friends and families who have lost a loved one tosuicide Mar 25 2025 The reasons forsuicideare multi faceted influenced by social cultural biological psychological and environmental factors present across the life course

For everysuicidethere are many more people who attemptsuicide. A priorsuicideattempt is an important risk factor forsuicidein the general population Aug 29 2024 Chaque anne prs de 703 000 personnes se suident et beaucoup dautres font une tentative desuicide

Chaque suicideest une tragedie qui touche les familles les communauts et des pays entiers et qui a des effets durables sur ceux qui restent

Lesuicideintervient nimporte quel moment de la vie et tait la quatrime cause de mortalit chez les 15 29 ans dans le monde en 2019 Sep 2 2025 Suicideis a major public health issue across a wide range of settings from highly developed to small Pacific island countries and areas.Suiciderates in some countries in the Western Pacific are among the highest in the world Suiciderates are also high amongst vulnerable groups who experience discrimination such as refugees and migrants indigenous peoples lesbian gay bisexual transgender intersex LGBTI persons and prisoners

By far the strongest risk factor forsuicideis a previoussuicideattempt

Prevention and control Suicides are preventable Sep 9 2019 Suiciderate highest in high income countries second leading cause of death among young people The global age standardizedsuiciderate [1] for 2016 [2] was 10.5 per 100 000

Rates varied widely however between countries from 5suicidedeaths per 100 000 to more than 30 per 100 000

While 79% of the worlds suicides occurred in low and middle income countries high income countries had May 23 2025 An estimated 727 000 persons died bysuicidein 2021.Suicidewas the third leading cause of death among 15 29 year olds second for females third for males

More than half of global suicides 56% happened before the age of 50 years and
