**Swallowed**Tiny Glass Shard Throat Pain and Bleeding Concerns Throat irritation and minor bleeding after swallowing sharp objects. Swallowing a small glass shard can cause throat pain and minor bleeding due to mucosal injury

Monitor for worsening symptoms like increased bleeding severe pain difficulty swallowing or breathing issues If small glass pieces are swallowed avoid inducing vomiting to prevent further injury. Rinse your mouth carefully and check for cuts or bleeding

Monitor for symptoms like pain bleeding difficulty swallowing or abdominal discomfort. Seek prompt medical evaluation to assess potential internal injury  
**Swallowed**Small Glass Piece When to Seek Help Concerns include throat irritation and potential digestive tract injury

Swallowing a tiny glass fragment may cause mild throat discomfort or irritation. Most small smooth pieces pass through the digestive system without harm I accidentally swallowed an earring

What should I do

**Swallowed**gum usually passes through the digestive system without harm

The feeling of it being stuck is often due to throat irritation or anxiety. Drink water and try swallowing saliva to help move it down. Avoid forcing food or liquids if it causes pain

If you experience persistent pain difficulty swallowing breathing issues or swelling seek medical evaluation promptly to rule out **Swallowed**Dental Crown What to Expect and When to Seek Help Concerns include choking risk and potential digestive tract obstruction

Swallowing a dental crown is usually not dangerous as it often passes through the digestive system naturally

Monitor for symptoms like persistent pain difficulty swallowing vomiting or abdominal discomfort Customer I swallowed a tortilla chip yesterday and it feels like a piece is either stuck in my throat or scratching it which is painful

I can breathe and swallow fine but it feels like there's a lump in my throat and it hurts. It's an isolated area on the right side

Doctor's Assistant How long have you been experiencing the sensation of the
