TAETechnologies is leveraging proprietary science and engineering to address the worlds biggest challenges

We are on the path to safe clean commercial fusion energy and delivering sustainable solutions in power management electric mobility life sciences and more Dec 18 2025 AboutTAE TAETechnologies is the worlds leading fusion power company developing the most sustainable and economically competitive solution to bring abundant clean energy to the grid and carbon intensive industrial processes TAEs proprietary technology will generate and distribute cost competitive 24 7 on demand fusion power to address the growing global need and secure our energy future TAETechnologies the most advanced clean fusion energy technology company developing carbon free cost effective energy with no harmful byproducts TAEis based in California and maintains international offices in the UK EU and Switzerland

Multidisciplinary and mission driven by nature TAEis leveraging proprietary science and engineering to create a bright future EnterTAEPower Solutions

Our revolutionary technologies were originally developed to bridge the gap between the amount of power needed to run aTAEfusion research reactor and what was supplied by the local power grid New research published in Nuclear Fusion from theTAEteam led by James Titus details how weve increased beam current drive and implemented fast modulation of beam energy enhancements that improve our plasma performance as we scale toward the cleanest safest commercial fusion power Beyond the companys world leading acumen in advanced beam technologies TAEs proprietary power management and power delivery technology developed for fusion experiments led to the launch ofTAEPower Solutions in 2022

TAETechnologies the worlds largest private fusion energy company has announced a landmark fusion technology milestone by producing stable plasma at 50M+ degrees Celsius in a proprietary compact reactor design that can scale to competitive fusion generated power Jan 24 2023 TAEis based in California and maintains international offices in the UK and Switzerland

Multidisciplinary and mission driven by nature TAEis leveraging proprietary science and engineering to create a bright future.
