Tails is part of the Tor Project a global nonprofit developing tools for online privacy and anonymity

To better protect you the same people are building the Tor network the Tor Browser and Tails Dec 11 2025 Tails doesn't work on smartphones or tablets. The hardware of smartphones and tablets is very different from the hardware of computers

For now it's impossible to make smartphone and tablet hardware work with Linux distributions like Tails. Detailed system requirements and recommended hardware

Other options Burning a Tails DVD Tails is built on solid foundations the Tor network the Debian operating system the GNOME desktop environment and all the tools included in Tails

We share back our improvements so that many more people can benefit from our work Starting the computer using a Boot Menu key can be faster than starting the computer on Windows first and then on Tails

We recommend you learn how to start Tails using the Boot Menu key if you use Tails regularly First steps with Tails Starting Tails Starting Tails on PC Starting Tails on Mac Accessibility Welcome Screen Administration password MAC address anonymization Introduction to GNOME and the Tails desktop Why is the time wrong? Tails 7.0 brings new versions of many applications included in Tails Apr 8 2021 Today we are releasing 7.3.1 instead of 7.3 because a security vulnerability was fixed in a software library included in Tails while we were preparing 7.3

We started the release process again to include this fix Nov 28 2024 Automatic upgrades are available from Tails 6.0 or later to 6.10. If you cannot do an automatic upgrade or if Tails fails to start after an automatic upgrade please try to do a manual upgrade.
