TakaraBio provides kits reagents instruments and services that help researchers explore questions about gene discovery regulation and function As a member of theTakaraBio Group Biomedical Technology Beijing Co. Ltd

is part of a company that holds a leadership position in the global market and is committed to improving the human condition through biotechnology For over 50 years TakaraBio has been committed to helping scientists break new ground with our innovative technologies

Our extensive portfolio of reagents instruments and services support advancements in the life sciences including frontline diagnostics and clinical applications TakaraBio s HQ grade reagents are manufactured to a higher standard than research grade reagents and meet many of the requirements for GMP grade

For a seamless transition to scaled up manufacturing HQ grade reagents provide TakaraBio is committed to providing our customers with comprehensive customer service and technical support as well as high quality custom manufacturing and contract research services High performance value and expert technical support are why researchers worldwide have published tens of thousands of peer reviewed studies using PCR polymerases fromTakaraBio

We create polymerases that simply work faster and better so you can focus on obtaining the results you need As a world leader in biotechnology research and development TakaraBio was the first company to market PCR technology in Japan and is also the developer of the RetroNectin reagent which is used as a world standard in gene therapy protocols TakaraBio has over 90 years of experience in pursuing excellence in biochemistry tools

We started in 1925 by improving fermentation techniques for cultivating microbes and in 1950 we launched a biotech R D center that yielded cutting edge advances TakaraBio s SmartChip ND Real Time PCR System allows you to flexibly design your own panels keep costs low and obtain results in under 3 hr

Sample dispensing and reaction mix distribution is automated for up to 5 184 reactions per chip TakaraTaq DNA polymerase is suitable for a variety of standard PCR applications

The enzyme is supplied separately or in a PCR premix format TakaraBio provides kits reagents instruments and services that help researchers explore questions about gene discovery regulation and function As a member of theTakaraBio Group Biomedical Technology Beijing Co. Ltd

is part of a company that holds a leadership position in the global market and is committed to improving the human condition through biotechnology For over 50 years TakaraBio has been committed to helping scientists break new ground with
