Jul 24 2024 This new experience combines the foundation of Bing's search results with the power of large and small language models (LLMs and SLMs)

It understands these search queries, reviews millions of sources of information, dynamically matches content and generates search results in a new AI-generated layout to fulfill the intent of the user's query. Transforms the traditional Bing search results page from a list of links into a more engaging magazine-like experience that is both informative and visually appealing. Nov 8 2025 Microsoft announces that Bing generative search has now been expanded to cover more complex informational queries. Jun 6 2025 The official Bing Search API is soon to be retired on 11th August 2025 or has already been retired depending on when you're reading this, and you may be searching for a suitable replacement. Jul 24 2024 Currently available to a small subset of users, Bing Search now incorporates AI-generated answers in addition to traditional search results directly on the search page. Jul 25 2024 Microsoft is releasing its own version of AI-powered summaries for its search engine, Bing. The company announced Wednesday, Sep 4 2025 Microsoft is testing expandable related searches in the Bing Search results.

When you hover your mouse cursor over the related searches, Bing will load more below them. Aug 4 2024 Bing Generative Search is the latest entry into AI-enhanced search results.

This development promises to have a sizable impact on user experience as well as the visibility and engagement with the organic performance of content. Oct 1 2024 In July, we introduced an early view of generative search in Bing, and today we're taking the next step as we continue to evolve our vision of the future of search. Today we're launching an all-new AI-powered Bing search engine and Edge browser, available in preview now at Bing, to deliver better search, more complete answers, a new chat experience, and the ability to generate content.
