Apr 20 2023 I had a lot of connections in the university computer science space and industry at the time and I remember thinking to myself that a combination of ateachingday job and some cool extracurricular academic projects could be both fun and rewarding Over 27 years ofteaching Ive learned just as much from my students as they have from me especially about what it means to be Canadian

One message consistently shines through their reflections being Canadian means striving to do the right thing in the world Nov 12 2023 Back in 2001 I wrote a Linux textbook

Twenty two years later it s in its sixth edition and contains some incredible features geared to the modern learner and learning environment. I ve now beenteachingtech for 25 years! Oct 12 2020 However Ive loved every part of this transition because I absolutely loveteachingtech courses online

Grant you Ive had some practice prior to 2020 as well as a general interest in how the Web could be used for education Mar 20 2020 You could respond to them right away or periodically e.g. after you finish a topic or sentence depending on yourteachingstyle. Do NOT aim for perfection

This isnt Broadway and youll gradually get better and better after doing many more online sessions. Expect things to go wrong Apr 13 2018 Ive always gravitated to opportunities professionally that I thought Id have a lot of fun doing and it naturally continued withteaching

So what have I learned fromteachingthese past 20 years?!? Dec 3 2023 Since many of our IT courses map to industry certification writing these exams keeps me sharp whileteachingrelated coursees and also helps me align topics in a way that makes it easier for students to prepare for the same certifications Teachingis not always easy it generally requires a lot of prep work including mastery of the underlying technologies used within the course as well as superb communication presentation and interpersonal interaction skills Dec 1 2024 On the academic side I continuedteachingmy new IT Professional program at the college during the mornings including the Server Cloud and Automation Technologies SCAT course I was very excited to finish designing earlier in the year Mar 20 2020 At the onset of COVID 19 teachers all over the world have had to quickly move to an onlineteachingformat to ensure social isolation

In this blog post I ll give you someteachingtips that may make that transition easier.
