May 20 2024 It s quite easy! Step 1. Find a bedrock shader that you like you can do this by searching bedrock shaders I use Kelly s Shaders for Bedrock. Step 2. Download and open with Windows Minecraft it should have the Minecraft logo like the picture

It should automatically import and install. Step 3

Create a new world go down to add ons click on resource packs go to my packs choose the Dec 23 2023 Here I am assuming you are using the DEFAULT minecraft launcher and that you have done your research and made sure to check your modloader mod version numbers are all compatible

First make sure you have Minecraft and whatever version of Java installed. Then install Fabric or Forge by following their instructions May 16 2024 Click that choose a version of Minecraft and choose the newest version of the Fabric modloader

Use the launcher to install the Iris Shaders and Sodium mods. If done correctly you can go in game to your video settings menu and see a new Shader Packs button

Click on shader packs and then the Open Folder button Feb 5 2020 Drag Optifine into that folder and run Minecraft on the Forge launcher once. Quit Minecraft. A shaders pack folder should now be in your .minecraft folder. Download the shaders and put them in the folder zipped

Launch Minecraft and go to video settings. There should be a shaders option

If you have questions ask Apr 9 2024 I also seen people say that shaders only work on optifine so how do you play with mods that are only compatible with forge but you have to use optifine to run shaders? That is not the case Jan 6 2024 Modrinth Minecraft Shaders or Curseforge are what I know of

Most of the shaders are listed there

Some of the shaders like SEUS Continuum use their own websites instead Jun 20 2022 The subreddit for all things related to Modded Minecraft for Minecraft Java Edition This subreddit was originally created for discussion around the FTB launcher and its modpacks but has since grown to encompass all aspects of modding the Java edition of Minecraft

The r feedthebeast subreddit is not affiliated or associated with the Feed the Beast company Aug 11 2022 This will actually remove your shaders because it opens an alternate version using essentials so my assumption is that maybe it works quicker if you just use your base game as an existing profile

I havent really worked with fabric before
