Sep 1 2025 Adolescence 10 19 years is a unique and formative time. Multiple physical emotional and social changes including exposure to poverty abuse or violence can make adolescents vulnerable to mental health problems

Promoting psychological well being and protecting adolescents from adverse experiences and risk factors that may impact their potential to thrive are critical for their well being Jun 30 2025 Adolescence is the phase of life between childhood and adulthood from ages 10 to 19

It is a unique stage of human development and an important time for laying the foundations of good health. Adolescents experience rapid physical cognitive and psychosocial growth. This affects how they feel think make decisions and interact with the world around them

Despite being thought of as a healthy The world now has more young people than ever before making up 42% of the world population

Around 1.2 billion of these young people are adolescents aged between 10 and 19 years Oct 23 2025 Adolescence is a time of rapid physical cognitive social and emotional development and the experiences of those aged 10 19 years have profound impacts on their well being both in the shorter and the longer term

Although well being is a broad concept with different interpretations WHO and the Partnership for Maternal Newborn Child Health PMNCH in collaboration with the United Nations Oct 11 2024 Understanding and addressing the specific health risks and needs adolescents face today is key to improving their future health as well as for broader social and economic stability Sep 23 2024 Increased investment is urgently needed to address evolving health risks and meet the mental and sexual and reproductive health needs for the nearly 1.3 billion adolescents aged 10 19 years globally according to a new scientific publication released by the World Health Organization WHO

Adolescence is a unique and critical stage of human development involving major physical emotional Sep 30 2022 Home Tools and toolkits Your life your health Tips and information for health and well being Life phase Adolescence and youth 10 to 24 years Keeping well in adolescence and youth Sep 25 2024 Copenhagen 25 September 2024 New data from the WHO Regional Office for Europe reveals a sharp rise in problematic social media use among adolescents with rates increasing from 7% in 2018 to 11% in 2022

This coupled with findings that 12% of adolescents are at risk of problematic gaming raises urgent concerns about the impact of digital technology on the mental health and well being of Childhood and adolescence are critical stages of life for mental health
