Jun 30 2025 Adolescence is the phase of life between childhood and adulthood from ages 10 to 19. It is a unique stage of human development and an important time for laying the foundation of good health. Adolescents experience rapid physical cognitive and psychosocial growth

This affects how they feel think make decisions and interact with the world around them. Despite being thought of as a healthy Sep 1 2025 Adolescence 10 19 years is a unique and formative time

Multiple physical emotional and social changes including exposure to poverty abuse or violence can make adolescents vulnerable to mental health problems

Promoting psychological well being and protecting adolescents from adverse experiences and risk factors that may impact their potential to thrive are critical for their well being Nov 26 2024 WHO fact sheet on adolescents health risks and solutions includes key facts and provides a definition information on specific health issues WHO response Sep 25 2024 Copenhagen 25 September 2024 New data from the WHO Regional Office for Europe reveals a sharp rise in problematic social media use among adolescents with rates increasing from 7% in 2018 to 11% in 2022

This coupled with findings that 12% of adolescents are at risk of problematic gaming raises urgent concerns about the impact of digital technology on the mental health and well being of The world now has more young people than ever before making up 42% of the world population

Around 1.2 billion of these young people are adolescents aged between 10 and 19 years Sep 23 2024 Increased investment is urgently needed to address evolving health risks and meet the mental and sexual and reproductive health needs for the nearly 1.3 billion adolescents aged 10 19 years globally according to a new scientific publication released by the World Health Organization WHO

Adolescence is a unique and critical stage of human development involving major physical emotional Sep 25 2024 Copenhagen 25

September 2024 Neue Daten des WHO Regionalbros für Europa deuten auf einen starken Anstieg der problematischen Nutzung sozialer Medien bei Jugendlichen hin wobei die Raten von 7 % im Jahr 2018 auf 11 % im Jahr 2022 gestiegen sind

In Verbindung mit der Erkenntnis dass 12 % der Jugendlichen durch problematisches Spielverhalten gefährdet sind gibt dies Anlass zu großer Oct 11 2023 The World Health Organization WHO is releasing the second edition of its Global Accelerated Action for the Health of Adolescents AA-HA! guidance

The document aims to equip governments to respond to the health and well being
