Jun 30 2025 Adolescence is the phase of life between childhood and adulthood from ages 10 to 19. It is a unique stage of human development and an important time for laying the foundations of good health. Adolescents experience rapid physical, cognitive and psychosocial growth.

This affects how they feel, think, make decisions and interact with the world around them. Despite being thought of as a healthy Sep 1 2025 Adolescence 10-19 years is a unique and formative time.

Multiple physical, emotional and social changes including exposure to poverty, abuse or violence can make adolescents vulnerable to mental health problems.

Promoting psychological well-being and protecting adolescents from adverse experiences and risk factors that may impact their potential to thrive are critical for their well-being.
