Apr 8 2024 WithAmazonBedrockKnowledgeBases you can securely connect foundation models FMs inAmazonBedrockto your company data using a fully managed Retrieval Augmented Generation RAG model May 9 2025 This document explains how to use metadatafilteringwithAmazonBedrockKnowledgeBasessto enhance search precision and relevance in Retrieval Augmented Generation RAG applications This notebook demonstrates how to implement dynamic

metadatafilteringforKnowledgeBasesforAmazonBedrockusing the tool use function calling capability and Pydantic for data validation By leveraging this approach you can enhance the flexibility and accuracy of retrieval augmented generation RAG applications leading to more relevant and contextually appropriate AI generated responses Nov 20 2024 One of its key features

AmazonBedrockKnowledgeBases allows you to securely connect FMs to your proprietary data using a fully managedRAGcapability and supports powerful metadatafilteringcapabilities To customize how the foundation model parses your documents provide instructions based on your document structure domain or use case

Use semantic chunking or hierarchical chunking to improve Retrieval Augmented Generation RAG performance Aug 25 2025 In this comprehensive guide well walk through building a production readyRAGsystem usingAmazonBedrockKnowledgeBases covering everything from initial setup to advanced optimization techniques Dec 1 2024 Amazon Bedrock Knowledge Bases has launched a new feature ofauto generated query filters for Retrieval Augmented Generation RAG workflows enhancing document retrieval accuracy

This feature simplifies complex search filtering and enhances the relevance of retrieved documents in RAG applications 3 days ago At AWS re Invent 2023 we announced the general availability ofKnowledgeBasesforAmazonBedrock

WithKnowledgeBasesforAmazonBedrock you can securely connect foundation models FMs inAmazonBedrockto your company data using a fully managed Retrieval Augmented Generation RAG model Mar 28 2024 KnowledgeBasesnow supports metadatafiltering which improves retrieval accuracy by ensuring the documents are relevant to the query.RAGapplications process user queries by searching across a large set of documents.
