Mar 17 2023 TeraOnline I will terribly miss you. I wish they hadn t focused on a terrible mistake but they made new maps and didn t listen to the community which blames them for killing 20x the mobs

Because of their input the game was focused on the next grafting gears instead of you guys focusing on expansion and the game experience. Fev months after Teragot closed I started working on recreating game. My aim is to make single player game with all buildings interactive and accessible to player

To achieve this I am remaking from scratch all meshes Jun 13 2022 Teraofficially on PC is closing on the 30th downloads have been disabled from Steam. ConsoleTeraretail is continuing if you have a console you can play it there accounts are not shared between platforms

If you want to play TeraPC from the 30th the only way is via private servers Jan 9 2023 Hello everyone. Sadly we all know that Tera was shut down in 2022. I however saw Tera available on PS5 which made me wonder at first but apparently it s still playable on console

Is this version of Tera crowded and is it worth giving a shot? Menma s Tera This is the private server par excellence the most populated currently you do not need to invest a lot of time in this server to be able to have your complete gear the costumes are earned by playing pve or pvp both communities are great the staff is very attentive and active any questions or question they respond quickly server hosted in France but the server has people from Jan 10 2024 Tera on PC isn t shut down

I was playing it earlier today. It seems more active and laid back than it used to. You can choose not to grind also

The only thing I wish is corsairs stronghold was still a thing There s a new server currently on beta but it s a South America server located in Brazil there s more than 250 people online and it s on the patch of the reaper. Novatera 175 votes 132 comments

41K subscribers in the TeraOnline community. For things related to TERA! You re entering the raid looking to land super effective moves anyway ideally with your typing STAB and ideally to be further augmented by your Tera

I ve seen some youtubers giving raid pokemon 1 setup with 3 different types of coverage moves. Doesn t make sense to me

Some worthy mention of raid pokes that I am personally using Apr 25 2022 Tera on console is run directly by the developers unlike the PC version which was run by numerous 3rd party companies like gameforge and Nexon
