What s going on here?TeXis a typesetting language. Instead of visually formatting your text you enter your manuscript text intertwined withTeXcommands in a plain text file

You then runTeXto produce formatted output such as a PDF file TUG is a not for profit organization by for and of its members also representing the interests ofTeXusers worldwide. If you use anyTeX related programs TeX LaTeX ConTeXt Metafont MetaPost Texinfo et al

please consider joining TUG or anotherTeXuser group It provides a comprehensiveTeXsystem with binaries for most flavors of Unix including GNU Linux and macOS and also Windows

It includes all the majorTeX related programs macro packages and fonts that are free software including support for many languages around the world TeX = tau epsilon chi and pronounced similar to blecch not to the state known for 'Tex Mex chili is a computer language and program designed for use in typesetting in particular for typesetting math and other technical from Greek techne = art craft the stem of technology material After you obtain theTeXLive distribution please read the main documentation forTeXLive which includes installation instructions for Unix and Windows

For MacOSX we recommend installing MacTeX which contains all ofTeXLive and more It has an export toTeXoption meaning that it can be used either as a conversion tool or as a WYSIWYG BengaliTeXeditor

CSTeX LaTeX and plainTeXsupport for Czech and Slovak users including special fonts 5 days ago The TeXworks project is an effort to build a simpleTeXfront end program working environment that will be available for all today s major desktop operating systemsin particular MS Windows 7 8 8.1 10 11 typical GNU Linux distros and other X11 based systems as well as macOS This page is about acquiring the originalTeXLivethe version ofTeXreleased by theTeXuser groups

If you want to getTeXas it is packaged by the myriad operating system distros see the information available from the particular distro you want Mar 8 2025 TeXLive 2025 was released on March 8 2025

For typical needs we recommend starting theTeXLive installation by downloading these links go to mirrors install tl windows.exe for Windows ~20mb or install tl unx.tar.gz ~5mb for everything else TheTeXLive Launcher takes care of the Windows specific items in caseTeXLive is already present e.g

on a network share. Configuration takes place when a user runs the launcher for the first time and Start menu shortcuts are replaced with controls within the launcher itself.
