By default your Android device stores encrypted recent locations with Google and participates in the Find Hub network a crowdsourced network of Android devices that uses end to end encrypted location information to help Android users find their lost devices Learn how to set screen lock on your device

By default your Android device stores encrypted recent locations with Google and participates in the Find Hub network a crowdsourced network of Android devices that uses end to end encrypted location information to help Android users find their lost devices Learn how to set screen lock on your device

By default your Android device stores encrypted recent locations with Google and participates in the Find Hub network a crowdsourced network of Android devices that uses end to end encrypted location information to help Android users find their lost devices Lock or erase your lost phone or computer If your phone tablet or laptop is lost or stolen follow these steps to help secure your device

If you can t get the device back taking a few steps right away can help protect your information Plan ahead in case your phone goes missing If you bought your phone from Google Fi or the Google store plan for the unexpected

You can take some steps to make it possible to find your phone and remotely lock or erase it if it should ever get lost or stolen Make sure your Android phone tablet and compatible accessory Has power Is connected to mobile data or Wi Fi Is signed in to a Google Account Has Find My Device turned on Is visible on Google Play If you use 2 Step Verification go to 2 Step Verification backups

Important Accessories need to be findable using Find My Device Network Manage your Google Settings Add or remove an account on Android Fix account sync issues Get to know your Android phone Learn how to use your Android device and get the most out of Google

Get step by step guides and instructional videos on how to set up your phone customize your settings and use apps

Google Your Android device stores encrypted recent locations with Google by default and participates in the Find Hub network a crowdsourced network of Android devices that use end to end encrypted location information to help Android users find their lost devices Find your iPhone Say Hey Google find my phone or find my iPhone and the voice assistant should send a notification to your iPhone that makes it ring for about 25 seconds

To stop the ringing and dismiss the notification tap the notification

When multiple devices are registered you need to be specific on which device needs to be onyoutubel will be gaming with fans and friends and expanding my
