Apr 16 2024 Make a new flow part with the input of the triggered data item in this example Website request. Create a connection triggre. Choose type Zapier. Send all properties from Website request

Create a datatrigger

This datatriggerneeds to be triggered when any property in the data item Website request is added changed or deleted based on the information in the second Nov 17 2025 Hi everyone Im exploring deeper automation with Triggre and I had a question regarding how Automation Flows are created

I understand that when you create an Automation Flow in the Designer with a Web APItrigger Triggre generates a public endpoint that can be called from external systems. That part is clear

However in my use case we want to create new automation flows programmatically
Dec 31 2019 Data triggers are a very powerful concept. If you want a flow to start when something happens to your data use a Datatrigger. There are three different types of Data triggers Add Update and Delete triggers

They start processes when data is added updated or deleted respectively. It is important to note that it doesnt matter what causes the data change

Whether it is a User flow or Dec 31 2019 Now ourTriggerappears in the Automation flow Click the green Add button connected to the Arrow to start building your flow

In this example we will add a Flow part In this example we will choose a Flow part we made specifically for this Automation flow called Send notification email for new user Struggling to automate your business? Discover the top 11 no code platforms to simplify your workflow

Keep reading to learn their pros cons and best use cases! Dec 31 2019 Using Scheduled triggers in Automation flows lets you start an Automation flow on a specific Date and time or on an interval

Scheduled triggers are very useful to start flows that send out reminders or periodically get data from other applications. To use the Scheduledtriggerin an Automation flow follow these steps Create a new Automation flow

Add aTriggerby clicking the Add button Meet Triggre a robust and secure platform that lets you launch replace and augment business software without writing code or recruiting additional staff Dec 31 2019 When you use Scheduled automation flows some of them probably perform tests based on the current date

An example every day you send emails to customers who did not pay their invoices
