Original URL: <https://tools.orientwatchusa.com/twisted-neighbors-exposed.pdf>

Twisted makes it easy to implement custom network applications. Here's a TCP server that echoes back everything that's written to it `stdiodemo.py` example using `stdio` `Deferreds` `LineReceiver` and `twisted.web.client`

`ptyserv.py` serve shells in pseudo terminals over TCP `courier.py` example of interfacing to Courier's mail filter interface `longex.py` example of doing arbitrarily long calculations nicely in `TwistedLongex2.py` using generators to do long calculations Welcome to the Twisted documentation! Installing Twisted Hard dependencies Optional Dependencies Twisted Core Developer Guides Examples Specifications Twisted Conch SSH and Telnet Developer Guides Examples Twisted Mail SMTP POP and IMAP Examples Developer Guides Twisted Mail Tutorial Building an SMTP Client from Scratch Twisted Names This document is for readers new to Twisted who are familiar with the Python programming language and at least conceptually with core networking concepts such as servers, clients, and sockets Using the Twisted Web Client Overview This document describes how to use the HTTP client included in Twisted Web

After reading it, you should be able to make HTTP and HTTPS requests using Twisted Web. You will be able to specify the request method, headers, and body, and you will be able to retrieve the response code, headers, and body Jun 7 2025 Twisted Internet is a collection of compatible event loops for Python

It contains the code to dispatch events to interested observers and a portable API so that observers need not care about which event loop is running Twisted strives to make the nature of the wire as transparent as possible with highly abstract interfaces for passing and receiving data such as `ITransport` and `IProtocol` Jun 7 2025 Twisted Python Utilities and Enhancements for Python

API Documentation for Twisted generated by pydoctor 24.11.2 at 2025-06-07 09:53:28 Resources are the lowest level abstraction for applications in the Twisted web server

Each Resource is a 1:1 mapping with a path that is requested; you can think of a Resource as a single page to be rendered Jun 7 2025 The reactor is the core of the event loop within Twisted, the loop which drives applications using Twisted

The event loop is a programming construct that waits for and dispatches events or messages in a program.
