Twisted makes it easy to implement custom network applications. Here's a TCP server that echoes back everything that's written to it: `stdiodemo.py` example using `stdio`, `Deferreds`, `LineReceiver` and `twisted.web.client`

`ptyserv.py` serve shells in pseudo terminals over TCP, `courier.py` example of interfacing to Courier's mail filter interface, `longex.py` example of doing arbitrarily long calculations nicely in `TwistedLongex2.py` using generators to do long calculations.
