Request a Device Sep 11 2024 Control and sync your RGB devices from one free application. SignalRGB is the only RGB software you ll ever need SignalRGB is a team of passionate gamers and creators dedicated to merging art and technology

Our team strives to illuminate the gaming world through innovative RGB solutions that inspire and enhance gaming experiences This video tutorial will walk you through how to setup your devices and get the most out of SignalRGB Try SignalRGB Pro to unlock access to game integrations audio visualizers macros and more! What Comes with SignalRGB Pro? Remove all ads in app and get Game Integrations Macros Automations Motherboard Fan Control PC Monitoring and Premium Lighting Effects All Components must be configured manually

SignalRGB has no way of knowing what is connected to each controller header. If you don t configure your motherboard headers and RGB controllers then the devices connected to them will not display lighting effects properly

Everything that needs configuration will appear at the top of the devices page If you re having an issue using a particular device in SignalRGB it may not be configured properly or require additional setup. Certain devices may require special configuration to get them working the first time.
