Nov 11 2018 VividSky This is the sky textures from my xVision preset so they can be used standalone or with other plugins. Not tested with Reshade but should work well

If you are using xVision it may still work by replacing the textures of your chosen preset with these but don t expect perfect results

Works in 11.35+! This package contains sky effects and optional components to improve your X Plane Aug 11 2018 Works in XP 11.35!VividThis is a preset for the xVision shader tweak which aims to provide a subtle and realistic effect without the cinematics. Customise to your own preference

Not tested with Reshade. It is recommended to ensure Run scripts in exclusive mode under the Resources Scrip Nov 11 2018 VividSky This is the sky textures from my xVision preset so they can be used standalone or with other plugins. Not tested with Reshade but should work well

If you are using xVision it may still work by replacing the textures of your chosen preset with these but don t expect perfect results. Wo May 17 2020 Generally I prefer b9 to b6. FPS increased a little no strobe effect so far no failure. But clouds kill very much FPS

I don t know if it s beta or it s just always been the case. I use ASXP but I can t use clouds other thanVividSky which are not the most beautiful. I wonder how people ca Sep 4 2019 VividWater A realistic water enhancement. If you are usingVividSky or X VisionVividpreset this is already included

X Plane water effects are lacklustre. This simple Lua script improves the wave animations to appear more realistic and less repetitive. The options available to control the wat Sep 23 2025 I found the night sky stars rather underwhelming in XP12 and XP11

In the folder XP12 resources default data there is a file named earth_astro.dat which lists stars from magnitude 1.46 to 6.5. There are about 8500 stars listed that make up the night sky. Being an avid backyard telescoper Mar 7 2020 Hi all. Sorry for the noob question

I downloaded the script named VividSky. The readme files state about installation Simply open each folder and copy the contained Resources folder to your root X Plane directory and replace

If I follow this procedure I m gonna overwrite the existing director Mar 25 2023 Hello I recently downloaded theVividSky 1.1 textures. I replaced the files in the bitmaps folder and I put thevivid_sky.lua vivid_water.lua and thevivid_tweaks.lua into the FlyWithLua folder
