Google Scholar provides a simple way to broadly search for scholarly literature

Search across a wide variety of disciplines and sources: articles, theses, books, abstracts and court opinions. Google Scholar aims to rank documents the way researchers do, weighing the full text of each document, where it was published, who it was written by, as well as how often and how recently it has been cited in other scholarly literature. Google Scholar includes journal and conference papers, theses and dissertations, academic books, preprints, abstracts, technical reports and other scholarly literature from all broad areas of research. Google Scholar Profiles provides a simple way for authors to showcase their academic publications.

You can check who is citing your articles, graph citations over time and compute several citation metrics. Google Scholar Metrics provide an easy way for authors to quickly gauge the visibility and influence of recent articles in scholarly publications.

Scholar Metrics summarize recent citations to many publications to help authors as they consider where to publish their new research. We work with publishers of scholarly information to index peer-reviewed papers, theses, preprints, abstracts and technical reports from all disciplines of research and make them searchable on Google and Google Scholar. Alex Krizhevsky, University of Toronto, Wojciech Zaremba, Co-Founder of OpenAI, Gabriel Goh, OpenAI, Oriol Vinyals, Research Scientist at Google DeepMind, Tim Salimans, Google DeepMind, Amsterdam, Jeff Dean, Google Chief Scientist, Google Research and Google DeepMind, Pamela Mishkin, OpenAI, Google Scholar includes scholarly articles from a wide variety of sources in all fields of research, all languages, all countries and over all time periods.

Chances are that your collection of research papers will be a welcome addition to the index. Professor of Computer Science, Stanford University, Cited by 227, 520 Machine Learning, AI, Graph, Neural Networks, Knowledge Graphs, Complex Networks, Troy University, Department of Mathematics, Cited by 2, 487 Mathematics, Education, Mathematics, STEM, STEAM, Education, Education and Environment.
