The SLE programme is the next wave of Singapore's green building movement. SLE buildings feature best-in-class energy efficiency, the use of onsite and offsite renewable energy, and other intelligent energy management strategies. SLEB Smart Hub offers smart services and resources to transform your buildings.

We leverage cutting edge data knowledge and artificial intelligence to help your buildings achieve Super Low Energy target. BCA introduced the Super Low Energy SLE Programme in 2018 to encourage firms to go beyond existing Green Mark GM Platinum standards to deliver buildings that can achieve at least a 60% energy efficiency improvement over 2005 building codes by Jul 1 2024. In summary, Singapore's Zero Energy building sector is still in its nascent stages of development, with less than 2% of the qualified buildings under the Green Mark Certification Programme having attained SLE or ZE certification from the BCA. As of mid September 2021, Singapore has 50 SLE certified buildings.

[1] These include office, industrial, residential and institutional developments. One notable example is Keppel Bay Tower, Singapore's first Green Mark Platinum Zero Energy commercial building. Discover how super low energy buildings SLEB are redefining sustainability.

Learn the strategies to achieve energy efficiency Certification Course on Driving Energy Performance in Super Low Energy SLE Buildings

Under the Singapore Green Building Masterplan (SGBMP), more ambitious targets to green the Built Environment sector have been set. Jun 24 2025, Singapore champions green buildings! Discover how innovative facades, smart retrofitting and biophilic design achieve energy efficiency and sustainable urban spaces. Westlite Accommodations, a newly developed dormitory block in Mandai, has been officially awarded the Green Mark 2021 Super Low Energy SLE certification by the Building and Construction Authority (BCA). The Zero Energy Building (ZEB) is Southeast Asia's first net zero energy building. SLE Smart Hub, a one-stop knowledge centre, and the Super Low Energy Buildings Technology Roadmap enable you and other industry practitioners to implement SLE and ZEB.
