Starting from Wine 2.8 the simple symlink editing method of configuration doesn't work. One has to configure COM ports by editing Wineregistry

From WineUser's Guide Other Things to Configure Serial and Parallel Ports To override Wine's default device mapping run wine regedit and create string entries in HKEY_LOCAL_MACHINE\Software\Wine\Ports where the entry name is the Windows device Aug 12 2013 I wonder if anyone has tried the following approach to run a 16 bit application under Win64? I can install a VMware virtual machine load Linux and use Winetox simulate the old Windows environment Dec 17 2023 I use Wine on Linux to install some applications from Windows but when I finish an install I see the Wine prompt quote Winehard disk is full quote

How can I add more space for Wine? My Wine never Sep 1 2019 I succeeded in installing a Windows application in Ubuntu 19.04 Disco Dingo I needed winetricks to install .NET 4.5

The application is configuration software for an electronic device with a US Dec 7 2025 I want to make sure I understand what you're asking Are you trying to make a Mac .app file using Sikarugir which is a Click once Windows app and so you're trying to install Sikarugir on OSX running Wine and want help with that? Because you mention Sikarugir and Mac and building app files and crossover and Wine which do the same thing and it's not super clear how these are all related WineHelp Open forum for end user questions about Wine

Before asking questions check out the Wiki as a first step. Forum Rules Subforums Linux macOS Android Feb 23 2023 That is if I put some file there in Wine applications the files appear as if they are in the C drive

Since I could delete the bottle or reinstall Linux etc I do not want to put permanent data into that virtual C drive

I want to create a data somewhere safe and link that directory under the virtual C drive directory Mar 12 2017 Since Wine is not an emulation it will run as fast as any other Linux application inside the virtual machine

Nowadays the virtual machines perform much faster than the specifications necessary to run older Windows programs I have a 16 GB USB flash drive inserted into a machine running Linux Mint

I want to use the Windows program Universal USB Installer via Wine the end goal here is to create a XenServer bootable USB Jan 1 2020 My wine met some problems while executing Windows executable file \$wineGECacheBldr.exe zsh bad CPU type in executable wine How to fix this? PS My wine is installed using HomeBrew \$ brew c.
