Oct 10 2018 Weapons of Mass Destruction The United States faces a rising danger from terrorists and rogue states seeking to use weapons of mass destruction. A weapon of mass destruction is a nuclear, radiological, chemical, biological or other device that is intended to harm a large number of people.

The Department of Homeland Security works every day to prevent terrorists and other threat actors from May 31 2022 Weapons of Mass Destruction. A weapon of mass destruction (WMD) is a weapon that is nuclear, radiological, chemical, biological or explosive that can kill or injure large numbers of people or greatly damage the infrastructure of a country or region. Biological Attack Fact Sheet A biological attack is the intentional release of a pathogen, disease-causing agent or biotoxin (poisonous substance produced by a living organism) against humans, plants or animals.

An attack against people could be used to cause illness, death, fear, societal disruption and economic damage.

An attack on agricultural plants and animals would primarily cause The DHS Countering Weapons of Mass Destruction Office (CWMD) to prevent attacks against the United States using a weapon of mass destruction (WMD) through timely responsive support to operational partners. Mar 3 2023 President Biden signed National Security Memorandum NSM 19 to Counter Weapons of Mass Destruction (WMD) Terrorism and Advance Nuclear and Radioactive Material Security worldwide. Congress established the Countering Weapons of Mass Destruction Office (CWMD) in 2018 to lead the Department's efforts to safeguard the United States against chemical, biological, radiological and nuclear (CBRN) and related threats. Feb 10 2025 The Department of Homeland Security (DHS) Countering Weapons of Mass Destruction Office (CWMD) relies on private sector partners to help us discover scientific advancements and technological innovations that solve chemical, biological, radiological and nuclear (CBRN) monitoring and detection challenges. The effective detection and attribution of biological threats depend on strong technical detection capabilities and the ability to connect biological information with all other actionable or discriminating information to contribute an additional layer to U.S. weapons of mass destruction (WMD) defense. Mar 17 2022 The Federal Protective Service responds to credible chemical, biological, radiological, nuclear and energetic materials (CBRNE) threats or incidents. Jun 10 2024 The DHS Countering Weapons of Mass Destruction Office (CWMD) works to prevent attacks against the United States using a weapon of mass destruction (WMD).

A weapon of mass destruction is a nuclear, radiological, chemical, biological or other device that is intended to harm a large number of people.
