I have just turned 85 and I started masturbating at about 11. Despite being married still masturbated although my wife and I having sex at least twice a week. My wife died 20 years ago and I have not remarried

I found it hard at 65 to get a woman who was still sexually active so I have not remarried The question for any married woman or women living with their bf or fiancé

Even though you have your man there to do the deed do you still masturbate at times and do you have sexual thoughts of being with another man or maybe your own man while masturbating? I am looking to see how common it is and how often you might find yourself doing it Well a lot of porn ends with the guy jerking off in the woman's face because that is how you say I love you in porn land but just a solo guy masturbating? No that is not a straight guy thing I was very conflicted about this as I was both filled with disgust it was my mother but also turned on it was a woman masturbating so periodically from 7th to maybe even 9th or 10th grade I would try and listen to her By the way just take a look at the comments below as they speak volume men often find it normal to masturbate to a known woman picture while women seem to feel it disgusting

They tell us women would be freaked out to find out a man masturbates to their pictures yet I bet a lot of men would be totally turned on by the same discovery A male reader anonymous writes 22 December 2009 im not really sure. as far as i can tell most women find masturbating a huge turn off

then again if you have a wife girlfriend and she likes having sex on a regular basis there is not much need for masturbating but that's just my opinion Question 8 December 2009 15 Answers Newest 4 May 2011 A male age 36 40 anonymous writes Is it possible that my girlfriend just masturbates in her sleep?
