

<<www.pornhub.comu>> What is the purpose of the WWW subdomain? Super User

Some websites don t work WITH the www. prefix.

â â â â Rating: 5 (8.612.105 reviews) - Free • [Www.pornhub.comu](https://www.pornhub.comu) • Access

Original URL: <https://tools.orientwatchusa.com/wwwpornhubcomu.pdf>

In agreement with bm. The domain eg google handles many services and thewwwkind of says which service it is using www mail smpt pop ftp. Of course aswwwtraffic is probably the most common kind servers will most likely know what is expected and act accordingly

Many servers are configured to redirect traffic from eg google.comtowww.google. One reason for this is I came across a site that doesn t work when I type in the address with the www. prefix

The following is an example if you click on this link it won t take you to any site but rather display an Oct 25 2013 Get the netgear wireless extender WN2000RPT working to configure First make sure the computer is connected to the netgear router via a cat 5 cable and cat 5 lights are blinking

Restart the computer and the Netgear wireless extender. Factory reset using paperclip to hold down 15 seconds until you see an orange flashing icon

Navigate to its internal default IP address 192.168.1.250 Mar 26 2021 Make a guess Your network environment is using something like Captive Portal that s relying on that non encrypted HTTP URL for CP login redirection Mar 9 2015 Hostname is an attribute of a system stored locally on that system

Computer name is what Windows uses to refer to the hostname. A subdomain is a DNS concept. In DNS domain names domains for short can be authoritative or non authoritative if they are non authoritative that means another server handles that domain

So in a domain such aswww.mysite.invalid one thing that could May 22 2011 Enable write permissions for the user logging in thru WinSCP. There are two ways to do this. The first way is to change the permissions on the folder to allow anyone to write to it. This isn t the best security

chmod 777 var wwwThe second way is to add your user to the group owning the directory and then setting permissions for the group to write to the directory. Find out who owns the Possible Duplicate What does wwws mean? When I open some websites its being displayed WW2 instead ofWWW

What it means and why? Edit to answer your original question yes any member ofwww data can now read and execute var www because the last bit of your permissions is 5 = read + exec

But because you haven t used the R switch that applies only to var www and not to the files and sub directories it contains

Now whether they can write is another matter and depends on the group of var www which you haven t I see some sites with urls such as www8.example.comor
