Aug 5 2011 I have installed the latest TKL dokuwiki appliance. I would like to make a directory for data accessible on the apache server. I read a previous post which said to place the newdir in the var www directory. This doesn't work

I followed the link to webroot and I made newdir there. Then you go directly into Dokuwiki and you are prompted if you want to create a new wiki. WordPress is a state of the art publishing platform with a focus on aesthetics, web standards and usability.

It is one of the world's most popular blog publishing applications, including tons of powerful core functionality extendable via literally thousands of plugins and supports full theming. Nov 8 2014 Although some might call it a feature! IIRC it is caused by the introduction of synchronous boot processing.

Basically fstab is being processed before networking has finished coming online, so fstab just skips any mounts that require networking. I just had a quick google and it looks like you need to set the mountnfs.sh script to run asynchronously.

See the details here Apr 27 2025 Hi BFF I'm glad that you resolved it but I wouldn't expect that to occur as Dehydrated should be pre-installed.

Could you confirm exactly which TurnKey version? If unsure, run turnkey version. Also, is this a clean install or one you've been running for a while? Anything else you can share that might help me understand how this occurred would be appreciated. Apr 9 2015 Which gave result as NO SUCH OBJECT.

It is showing no such object. 2. We tried to delete the object with ldapdelete.

ldapdelete x D cn=username dc=XXX dc=ABC w pwd h IP p PORT uid=uesrid I=XX c=XX ou=XX dc=XXX dc=ABC Results as NO SUCH OBJECT 3. We tried to add record in LDAP manually with LDAPADD

ldapadd x D cn=username dc=XXX dc=ABC w pwd h IP p PORT f Nov 21 2023 1. Hmm, it is interesting that SVN via http/https just works and I must admit that I wasn't consciously aware of that.

Although after having a closer look at the Redmine appliance build code, I can see that we're installing the Apache mod_svn package and there is also additional SVN specific Apache conf.

Now I'm looking at it. I vaguely recall that our Redmine appliance did used to include Jan 8 2014 Why would you want to write an ISO to a USB drive? Typically, one of two reasons: Compatibility. You want to boot the ISO on a physical computer that doesn't have a CD drive.

Originally, ISO files were intended to be burned to physical CDROM discs.
