Nov 11 2025 What is nuclear fission? Nuclear fission is a reaction where the nucleus of an atom splits into two or more smaller nuclei while releasing energy

For instance when hit by a neutron the nucleus of an atom of uranium 235 splits into two smaller nuclei for example a barium nucleus and a krypton nucleus and two or three neutrons Nov 7 2025 The IAEA is the world s centre for cooperation in the nuclear field promoting the safe secure and peaceful use of nuclear technology

It works in a wide range of areas including energy generation health food and agriculture and environmental protection Dec 23 2024 Nuclear energy was in the spotlight in 2024 as the IAEA and the Government of Belgium organized the worlds first Nuclear Energy Summit and the IAEA raised its projections for nuclear electrical generation for the fourth year in a row

Our explainer on nuclear energy was the most read in English and in all the other UN languages. Read it here Sep 13 2023 Nuclear fusion is the process by which two light atomic nuclei combine to form a single heavier one while releasing massive amounts of energy

Fusion reactions take place in a state of matter called plasma a hot charged gas made of positive ions and free moving electrons with unique properties distinct from solids liquids or gases Oct 17 2025 The IAEA assists its Member States in using nuclear science and technology for peaceful purposes and facilitates the transfer of such technology and knowledge in a sustainable manner to Member States The IAEA fosters the efficient and safe use of nuclear power by supporting existing and new nuclear programmes around the world catalysing innovation and building capacity in energy planning analysis and nuclear information and knowledge management

The Agency helps countries meet growing energy demand for development while improving energy security reducing environmental and health Oct 22 2025 Nuclear science and technology is the foundation for all the IAEAs activities

The Agency assists Member States with scientific advice education training and technical documents in many nuclear science areas provides key nuclear data and helps them improve awareness about the wide range of applications of nuclear technology Jan 24 2025 Nuclear energy is still providing the world with a quarter of its low carbon power and supporting the roll out of intermittent renewables like solar and wind

In future we will see even more nuclear deliver the clean reliable and secure power the world needs Aug 3 2023 Nuclear fusion is the process by which two light atomic nuclei combine to form a single heavier one while releasing massive amounts of energy
